## An Overview of Ketchikan

Ketchikan comes from the Tlingit word "Kitschk-hin" meaning eagle wing river derived from the fact that a bolder in the stream at the falls broke the water giving the appearance of the spread wings of an eagle. Ketchikan is located on the southwestern coast of Revillagigedo Island, locally known as Revilla. The island was named for the Viceroy of Mexico in 1793 by Captain Vancouver.

In the year 1883, the first white settlers came to Ketchikan and built a fish saltery, followed by more than a dozen canneries producing more than 2 million cases of salmon per year. Ketchikan quickly earned the title "Salmon Capital of the World." In 1897, mining contributed to the growth of the settlement with the Gold Rush Era and, believe it or not, today "Gold Rush Fever" is still alive! In 1903, the Ketchikan Spruce Mill opened and provided lumber to the salmon industry.

Most of the major sights are within easy walking distance of the dock. The centerpiece is Creek Street, a historic district lining a curved plank road along Ketchikan Creek. Dating back to Gold Rush days, this row of colorful houses was a red-light district of brothels and speakeasies. Today, it overflows with gift shops, art galleries, and restaurants. The only hint of its racy past is Dolly's House, a former brothel named for wellknown madam, Dolly Arthur. Once billed as the place "where men and salmon came upstream to spawn," it's now a small museum
